BUYING - PROTECTION PRODUCTS

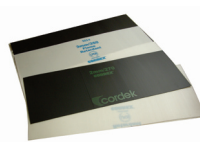

CLASSIC FLOOR PROTECTION

One small step for a labourer - one giant bill for the contractor. A great deal of time and money is invested by our customers into providing an agreeable finish to the floor areas and interiors within their new properties and refurbishments. Dorsey provide a wide range of floor protection products to help you to minimise the risk of damage to your finished product. As with all of the products featured within our brochure, our protection products are always available from our depot stocks and will be delivered to site next day.

FIRE RATED PROTECTION

Many of our protection products are available as LPS1207 approved, now a condition of use on many contracts.

CORREX BOARDS

A very popular choice for floor protection, the Correx boards are available in a range of thickness and grades. Some of the most common reasons for choosing the Correx product include their light weight and easy cutting to shape, plus the suitability of the translucent grade for window frame and glass protection.

DURASHIELD HD PAPER

One of our best selling protection products, Durashield is a heavy duty, wear resistant board, supplied as a 1m x 100m roll. A favourite of House-Builders, this economical and hard wearing product can be easily cut, taped or stapled. The convenient width is perfect for creating protection to walkways and corridors etc, avoiding damage to floor areas for less than around 50p per m².

If you don't yet have a schedule of net rates based upon your company's individual requirements then please call us and allow us to offer you a quotation.

BUYING - PROTECTION PRODUCTS

ANCILLARY PRODUCTS

Ultra Low Tack Tape is probably the most popular means of fixing our various protection materials, allowing a firm stick whilst ensuring no residue is left nor damage done to the finished product. Also available are High Tack Tapes, Foil Tapes, Staples & Guns as well as Tape Dispensers. Together with Bubble Wraps and Pallet Wraps, Window Films and Door Bags, Dorsey have a protection product for almost every site situation.

SPECIALIST PROTECTION SOLUTIONS

Not all our protection products are for internal use. Layflat tube / temporary down pipe, is often used to direct rainwater run off for part constructed roofs prior to the later fitting of the permanent down pipe system. This solution ensures that this often considerable quantity of water is kept away from the new brickwork and out of the part finished building, avoiding unnecessary damp and damage. You can fit this "pipe" to gutter outlets using high tack or duct tapes, Jubilee ties or with cable ties, all of which are available ex stock.

DOOR JAMB PROTECTION (REUSABLE)

Internal joinery is especially vulnerable to accidental knocks and scrapes, door jambs are particularly at risk being part of the route through the building. Our Door Jamb protectors are reusable plastic sections which are simply clipped over the jamb, totally covering the woodwork to a height of 2m, until the risk from your various trades subsides. Once the dangers subside the mouldings are moved onto the next plot, phase or contract, leaving the door jamb in the condition it was in on the day it was fixed.
