BUYING - WINDOW FORMER CAVITY CLOSER SYSTEM

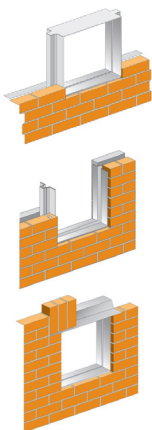

WINDOW FORMERS

Preformed window frames are a builder friendly, cost effective and time saving product. They provide an accurate brick template for window and door reveals that also closes and insulates the cavity. They can be used with all window types including timber, aluminium and PVCU. Factory manufactured off site to the highest standards, they arrive labelled and ready for immediate installation. By eliminating the need to fabricate temporary timber formers on site, material and labour cost are saved and the speed of construction can be significantly improved

EASY INSTALLATION GUIDE

Build wall up to the sill height and locate former, ensuring the insulation sits neatly in the cavity. Build up the courses of brickwork and insert brick ties every 225mm. Brick up to lintel height and remove bracing. Build in lintel and complete upper brickwork.

Dorsey's chosen partners are Dacatie and Securiframe who manufacture and fabricate the system for us. We have found both the product and manufacture to be of the highest quality and the partnership enables Dorsey to provide the best possible service to our customers.

KEY BENEFITS & ADVANTAGES

The product is manufactured off site allowing labour to focus on the priority tasks. Staged delivery saves storage space on site and reduces the risk of theft or damage. Speed of construction improved as manufactured and stored off site ready for immediate delivery. Cost effective solution which incorporates all labour and material costs. The product complies with new Part L, and is also available in a fire rated version
