

Cavibrick

high performance air-brick

- High air throughput
- Insect screening
- Self-draining base
- Clip together to make up composite sizes
- Range of colours

use

The cavibrick is a high performance ventilator which may be used instead of a conventional air-brick.

introduction

Manufactured to brick dimensions, the cavibrick promotes a high air throughput, via a front louvred grille. The louvres are proportioned to maximise performance whilst contouring the air to challenge through-draughts. The louvres are also spaced to comply with the latest BS requirements but have been staggered to offer also an insect resistant screen which is not offered on some standard airbricks.

The cavibrick incorporates a water dam back to prevent rain penetration and crossflow

separators. Moulded in a range of colours, the cavibrick may be used singularly, or in multiples. The cavibrick is fully compatible with our range of telescopic and straight sleeves.

data

- BS polypropylene, in terracotta, slate, beige, brown, white and black.
- Approx. size 220mm x 60mm x 70mm.
- Free airflow up to 7,500mm² per cavibrick.
- May be used singularly or clipped together to create 150 x 225 and 225 x 225mm sized airbrick assemblies.
- Packed in boxes containing 50no.
- Smaller quantities available.
- Attachments available – see entries.

Cavibrick Sleeves

- Range of sizes
- Compatible with Cavibrick
- Fold flat storage
- Unobstructed airflow

use

Sleeve attachments to provide ventilation to specific areas.

introduction

A range of straight sleeves to accommodate one, two or three cavibricks. (High throughput cavibricks are designed to be used singularly or can be locked together to form larger brick-sized ventilating units.)

When connected to a cavibrick the combined length is sufficient to accommodate all popular cavity wall widths. The three standard straight sleeves are: 75mm x 225mm, 150mm x 225mm and 225mm x 225mm.

We recommend sleeves are protected with a cavitray where they pass through the cavity, to comply with NHBC/best practice. (See Sleeve and Duct Cavitrays.)

data

- Black polypropylene.
- Length 300mm.
- Special lengths to order.
- 75mm x 225mm, 150 x 225mm, 225mm x 225mm.
- Fold-flat design minimises storage space.
- Packed in boxes containing 50no.
- Smaller quantities available.
