For fixing of:

- Pictures
- Lamps
- Skirting
- Electric switches
- Key boxes
- Shelves for spices

Description

- The self-tapping metal fixing GKM taps itself a positive fit in plasterboard.

Examples of use

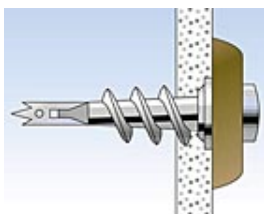

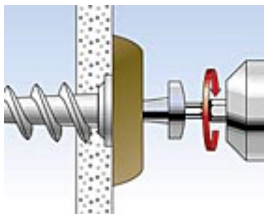

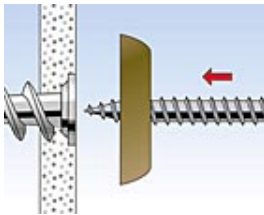

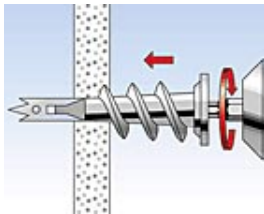

Installation

Type of installation

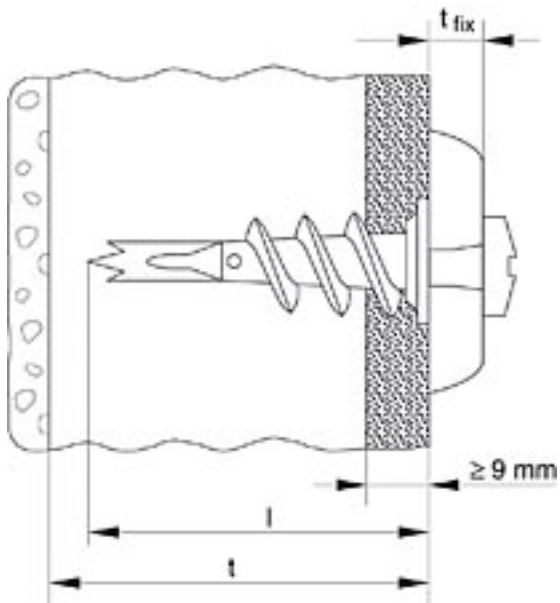

- Flush installation

Installation tips

- Not suitable for tiled plasterboard.
- Adapted for wood, self-tapping and chipboard screws of 4.0 to 5.0 mm diameter.
- In gypsum fibreboards we recommend to drill a hole first (\varnothing 8mm).
- Restrict the torque if using electric screwdrivers.
