# BUYING - FLYSCREEN & VERMIN BARRIER

Many of our ventilation products are supplied with a degree of insect and vermin protection, however we are often required to provide bespoke protection by adapting existing products by the inclusion of additional flyscreen material, or by supplying sheet or strip to our customers specification for use as a stand alone barrier. Our flyscreen materials are of a sufficiently fine mesh to exclude the smallest of bugs and flies, yet robust enough to withstand the rigors of the British climate. These flyscreen products will neither rot nor rust whilst ensuring airflow to your cavity or roof-space.

## CUT TO SIZE

With an in house cutting service Dorsey are able to supply almost any width / size flyscreen. In the case of the Fibreglass, Stainless Steel and the Aluminium Screen, we cut from a log width of 1200mm enabling us to supply any width from this down to a 75mm strip. In the case of the Perforated Zinc, we are able to offer pre-cut panels - ideal for use as a barrier against insects and vermin with airbricks and other vent terminals.

## FLYSCREEN MATERIAL OPTIONS & SIZES

MESH TYPE	GAUGE	COLOUR	WIDTH	LENGTH
Fibreglass (coated in PVC)	18 x 16g	Grey/Black	1220mm	50m roll
Aluminium (self colour)	18 x 16g	Bright Finish	1220mm	30m roll
Stainless Steel (self colour)	18 x 16g	Bright Finish	1220mm	30m roll
Perforated Zinc (self colour)		Bright Finish	900mm	2400mm
